

Sell Your Home Faster, For More Money!

Rent Talking House®
For only \$2 a day.

Watch the **SELLING YOUR HOME** video to see how to sell your house's best features 24 hours a day/7days a week!

WHY TALKING HOUSE? Talking House is proven to sell houses faster. In a national study, Talking House cut the time it took to sell a house in half! From an average of 72 days on market to only 37 days on the market. Why? Because home buyers love it! They get the instant information they want and need. Every study of home sales has shown that the first step home buyers take is to drive the neighborhoods they want to live in. There is no better way to have your house stand out, instantly give the buyer information they need, draw in only qualified buyers, and ultimately, sell your house faster. No wonder this system has already sold more than one million homes in all 50 states.

WHAT IS TALKING HOUSE? Talking House is an amazing piece of patented wireless technology. It's a radio transmitter with a built-in, digital record/play-back computer chip. You simply record a message describing all the wonderful details about your house. Then, your house broadcasts this message to car radios, and sells itself to every prospective buyer who drives-up.
